Employee Training and Development Policy

Inclusive, role-relevant, measurable learning and competence development

Policy owner	Human Resources and Learning and Development
Status	Proposed revised draft pending management, HR, and legal approval
Proposed version	3.0
Review cycle	Annual or when law or operations change
Supersedes after approval	EmployeeTraining&Development_Policy_v2.0.docx

Approval notice. This proposed revision preserves the intent of the approved source policy and adds controls commonly expected in a mature policy framework. It does not replace version 2.0 until formally approved. Applicable law and written employment terms prevail where they provide a higher standard or different mandatory requirement.

Purpose

This policy ensures that employees have the knowledge and skills needed to perform safely and effectively, meet compliance obligations, adapt to changing work, and pursue fair development opportunities aligned with company needs.

Scope

This policy applies to full-time and part-time employees and interns. Relevant mandatory training may also apply to contractors and temporary workers based on their duties and access.

Objectives

- Close documented skill and knowledge gaps that affect current or future work.
- Support onboarding, job competence, compliance, leadership, professional growth, succession, and business resilience.
- Provide inclusive and reasonably accessible learning opportunities based on role and organizational need.
- Evaluate whether training improves competence or performance rather than measuring attendance alone.

`

Roles and Responsibilities

Role	Responsibilities
Employees	Identify relevant needs, participate actively, complete required learning and assessments, apply learning, and provide honest feedback.
Managers	Define role competence, identify gaps, support equitable access and application, approve plans, and review results.
Trainer or Learning function	Design or source suitable learning, validate content and facilitators, maintain records, evaluate effectiveness, and improve programs.
Human Resources	Oversee governance, inclusion, career-development alignment, vendor and data controls, and policy review.
Information Security and subject owners	Approve technical or regulated content and define mandatory completion and refresh requirements.

Training Categories

- Onboarding and orientation, including policies, culture, role expectations, safety, privacy, and security.
- Job-specific and technical learning for systems, processes, tools, client requirements, and quality standards.
- Mandatory compliance, ethics, safety, privacy, information security, and conduct training.
- Professional, leadership, communication, project, and career development.
- Cross-training, coaching, mentoring, communities of practice, and structured self-study.

Annual Training Cycle

1. Needs assessment. Managers and the learning function identify needs from role profiles, performance reviews, incidents, audits, technology changes, succession plans, employee input, and business goals.
2. Prioritization and plan. Proposed training is prioritized by risk, mandatory requirement, role impact, skill gap, benefit, cost, delivery method, accessibility, and operational capacity.
3. Approval. The employee's manager approves role-specific learning; budget owners approve costs; designated owners approve mandatory or regulated content.
4. Delivery. Training may use in-house sessions, online learning, coaching, workshops, conferences, supervised practice, or self-study with suitable evidence.
5. Evaluation. Effectiveness is assessed through feedback, knowledge or skill checks, observation, work outcomes, quality indicators, and follow-up appropriate to the subject.
6. Improvement. The learning function records lessons, updates materials, addresses access gaps, and reports aggregate completion and effectiveness to management.

Mandatory Training

Employees must complete assigned mandatory training by the stated deadline. Managers must provide reasonable work time and access. Overdue completion will be followed up first as a support and access issue; repeated unjustified non-completion may be handled under the performance process. Critical system or task access may be withheld until required competence is demonstrated.

Employee-Requested Development

Employees may propose development linked to current duties, future capability, or an agreed development plan. Approval is based on relevance, performance needs, cost, workload, available budget, equitable access, and expected benefit. Approval of one request does not create an automatic entitlement for another employee or future year.

Costs, Time, and Repayment

Approved mandatory training is company-sponsored and normally treated as working time where required by law or company decision. For optional external programs, the approval must state fees, travel, study time, examination attempts, and any repayment condition. A repayment obligation is valid only when lawful, reasonable, proportionate, and agreed in writing before the cost is incurred.

Inclusion and Accessibility

Selection and participation must be free from discrimination and retaliation. Delivery should be accessible across location, schedule, language, disability, and technology needs where reasonable. Employees may request a workplace or learning adjustment through Human Resources without disclosing more information than necessary.

Training Data, Materials, and Confidentiality

- Attendance, assessment, qualification, feedback, and development records will be access-controlled, accurate, and retained under the company schedule.
- Individual results will be shared only with authorized persons for legitimate development, compliance, safety, or performance purposes.
- Company, client, and personal data must not be placed in unapproved learning platforms or training examples.
- Copyright, licensing, recording, and reuse restrictions for learning materials must be followed.

Quality and Review

The learning function will review mandatory content on a defined cycle, validate significant changes with subject owners, monitor completion and effectiveness, and review this policy annually.

Reference Framework

These sources informed the proposed controls as non-binding benchmarks. They do not replace applicable law, employment contracts, or approved company policy.
